ALL SHIPPING LINES, AGENTS, HAULIERS, TRADERS AND PORT USERS

REF: DPA / NA / 06 / 03 / 2006

REQUIREMENT OF LOAD DETAILS OF CONTAINERS

Further to our earlier circular DPA/NA/18/06/2005, All Shipping Lines and their Agents are requested to submit the below mentioned data for all **Export and Transshipment Containers** before arrival in the Port.

- **Outbound Carrier – Name of Vessel & Voyage Number/or Rotation Number**
- **Port of Discharge**
- **Gross weight of containers inclusive cargo**

Above information is necessary for efficient yard planning to achieve higher productivity and faster turn around of vessels. The EDI format has been modified with additional space to allow for entry of Rotation Number as an option.

Failure to provide the above data on time will demand for shifting the containers, hence call for a charge of Dhs.60/- per container which will be under tariff item 321.9 (a) (New Item). This will be strictly implemented with effect from **1st April 2006**.

For change of outbound carrier after the container has been discharged into the yard will also be required to shift, hence there will be a charge of Dhs.60/- per container, which will be under the new tariff item 321.9 (b). This will be strictly implemented with effect from **1st April 2006**.

All shipping lines their agents and Traders are requested to ensure that for all Export Containers above information is also provided before container brought into port.

Failure to provide the information of outbound carrier will attract a charge of Dhs 60/- under Tariff item 321.10 (a) or (b).

We look forward to your support and understanding in providing us the desired data on time in order to avoid shifting of containers.
