

DP World, a leader in international ports management and related services is committed to provide a safe and efficient traffic management across Jebel Ali Port's road network, which is a commitment aligned with our business objective.

This policy has been established to ensure a safe and smooth traffic system within the Jebel Ali Port which would provide distinguishable service to the employees, customers, visitors, stakeholders and all relevant interested parties which provides the framework for RTS objectives and targets that would lead to a successful and continued growth of business.

It is the objective of DP World – Jebel Ali Port to:

- i. Continuously commit to provide an integrated and sustainable traffic system, along with distinguishable services the employees, customers, visitors, stakeholders and all relevant interested parties
- ii. Identify and evaluate all traffic related risk and establish controls to manage and reduce any or all quantified risk to an acceptable level utilizing proactive threat identification, risk assessment, risk management and clear communications to achieve this.
- iii. Adopt Key Performance Indicators (KPI) to measure performance and effectiveness of measures taken to achieve the specific objectives and goals, which would ensure smooth, safe and quick traffic system for efficient growth of business.
- iv. Continually improve measures adopted to manage and monitor the traffic services through regular internal and external audits to evaluate the effectiveness of the RTS Management System.
